Wishbone  
site furnishings

## Solutions for the Future...

Wishbone Site Furnishings is a proud Canadian manufacturer raising the bar on innovation and design while maintaining practicality and functionality in site furnishings since 1995. We build exceptional products, provide incomparable service and deliver outstanding value. Our products delight customers and users alike, not just in the beginning, but after many years of active service. Longevity and ease of maintenance are as important to our designs as style and uniqueness.

## ...from Pieces of the Past

Wishbone embraces innovative design while minimizing environmental impact. We are intentional in every product design, emphasizing the recycled content and the sustainability of the materials used. Environmental stewardship is important to our customers and central to Wishbone as we create beautiful site furnishings that work better and last longer than alternatives.

We look forward to applying this approach to meet your needs.

John Jansen, President

*Creative Functional Durable Unforgettable*

# Wishbone Innovation

## Distinctive LED Lighting

Wishbone developed one of the most exciting park furniture options in years by being the first to incorporate LED lighting beneath tables or benches. Create ambiance, facilitate safety or simply incorporate a unique look with efficient low-voltage LED lighting by Wishbone.

## Rapid Assembly Pit Toilet Building

The John is designed as a modular system that can be assembled with few tools in minimal time. Tongue-in-groove recycled plastic lumber slats fit seamlessly into channels with only a few hidden fasteners, making the unit tamper resistant. Perhaps most importantly, the recycled plastic lumber will not rot or absorb moisture and is highly odour resistant.

Easy to assemble and maintain. And it smells better!

## Self Watering Planters

Wishbone self watering planters employ a bottom feeding approach to produce a vibrant and healthy display of plants and flowers in a stylish enclosure. In most environments they only need to be filled once or twice a month, saving time and maintenance costs while reducing water consumption by up to 80%. Enjoy natural beauty and a lower carbon footprint.

## Multi-Functional Furnishings

The Annon modular bench allows for a wide range of configurations to suit many applications. Fun, colourful and durable, this bench is perfect for water parks, playgrounds and landscaping features. Additionally, the Annon can act as a water reservoir for irrigation by adding a gravity-fed, slow-drip hose adaptor. Not only is it playful and customizable, it is also functional, saving time and money.

# Wishbone Manufacturing

## Precision Craftsmanship

At Wishbone we take pride in every product we create. Our team of skilled craftsmen manufactures, assembles and finishes every piece to exact specifications. By managing all stages of manufacturing, we can ensure the highest quality, accommodate a variety of customization and continually thrill our customers.

## 100% Recycled Aluminum Castings

At Wishbone's Canadian foundry the cast aluminum components are made from recycled car and truck rims.

## 100% Recycled Plastics

The Avantage +™ boards used in Wishbone products are made from 50% post-consumer and 50% post-industrial recycled plastics. Beyond benefitting the environment, they are non-toxic, ultra-durable and low maintenance. Many of our furnishings with Avantage +™ have been in service for over 10 years. They still look great and function like new.

Avantage +™ is available in 7 colours:

## Wishbone Powder Coating

Our process starts where others finish. Wishbone supports "green" building practices, so we utilize an environmentally friendly powder coating that contains no VOCs and results in a finish that is safer for human health than other coatings.

Super-durable polyester powders have become the mainstay of the architectural railing industry due to their outdoor performance. Our special TGIC powders meet or exceed AAMA specifications with superior gloss retention and weathering resistance.

Get all the technical details at [WishboneLtd.com/powdercoating](http://WishboneLtd.com/powdercoating).

Available in 9 standard colours (plus custom):

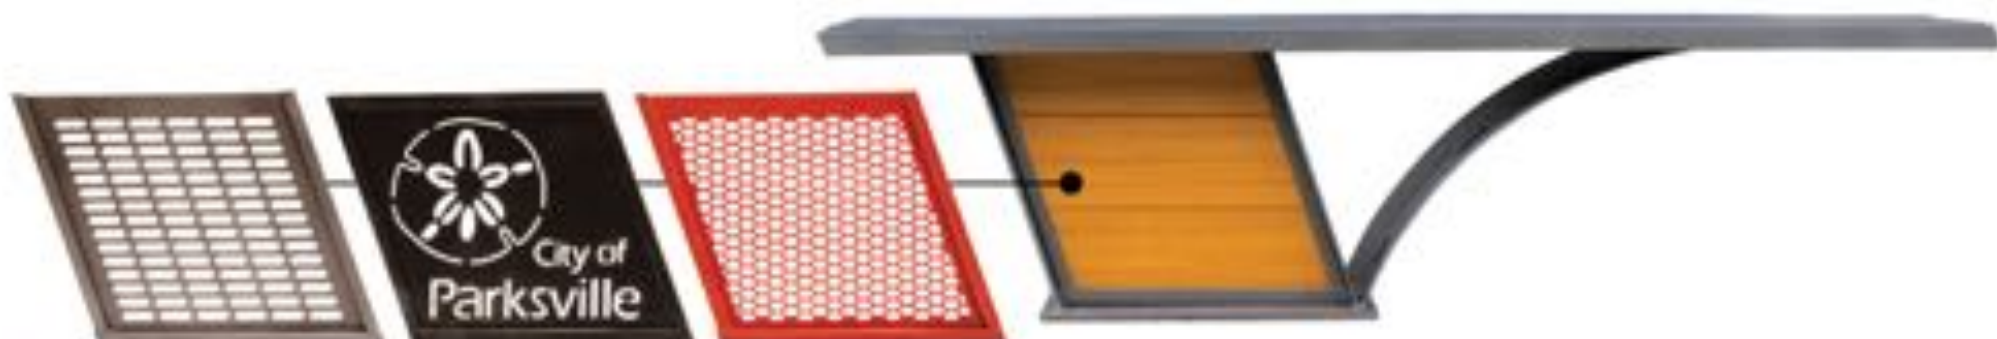

# Customization

## Customizable Pedestal

The fluid look of City Scope benches is enhanced by the ability to easily customize the pedestal that supports the seating area. Imagine benches that exactly match architectural design elements and utilize leftover building materials to do so. Alternatively, take the opportunity to integrate unique designs directly into the bench to create a specific look or emphasize project branding.

## Custom Designs

Wishbone continually develops new ideas and concepts in site furnishing design. In some cases these designs are initiated by our customers, based on their considerable field experience or a specific need. Got a great idea or concept?

Into reality.

Challenge us!

## Custom Modifications, Routing or Casting

A standard catalogue of products cannot perfectly fit every application. When a project requires variations to our existing designs, we work with clients to develop a great solution. Whether dimensions, angles or other factors need to be adjusted to satisfy specific requirements, we work to exceed the expectations of our customers and users. Logos, phrases and even intricate designs can be routed directly into the recycled plastic lumber, or cast directly into the aluminum, making them integral to the finished pieces.

# Park Benches

At Wishbone, benches are so much more than "just benches." They facilitate relaxation. They encourage experiencing the surroundings. They enhance the look and purpose of a location.

We believe benches should be thoroughly enjoyed. By blending sustainable and recycled materials with unique designs, we create durable outdoor furnishings that are as functional as they are beautiful.

Sit on a Wishbone bench and you'll want to stay a little longer.

# More Benches

When designing public spaces, options in terms of form, function, materials, and colours are key.

Backless benches allow people to sit on either side and give designers flexibility with configurations and patterns of furnishings to complement a space.

Wishbone All Metal benches are made entirely of aluminum. They are designed to be cooler in hot environments and discourage vandalism. Many incorporate a no-weld design that simplifies shipping and parts replacement.

At Wishbone, more is more!

# Specialty Benches

As a leader in the industry, Wishbone pushes the boundaries of traditional benches, exploring novel concepts in both design and function.

Our specialty benches are expressions of this approach that inspire the maximization of space, facilitate a high level of comfort and encourage community, all at the same time.

# Tables

Tables create community. Whether enjoying something to eat, playing a game or just sitting down to chat, tables bring people together to enjoy some of life's special times.

Wishbone tables are designed to encourage use by being comfortable, solid and inviting. No climbing over a support to sit down. Made with long-lasting recycled materials, they resist weathering and continue being attractive and functional year after year after year.

# Receptacles

Keeping public spaces clean and scenic is at the heart of every Wishbone receptacle.

In designing our receptacles, we consider how they are used, how they enhance their setting and how they are maintained. Each receptacle design is the result of countless interviews, customer feedback, analysis, and testing. We have receptacle options to complement any space.

Features such as animal resistant hidden door latches, as well as foot pedals for hands-free operation, really set us apart.

# Bike Racks Bollards

Like all site furnishings, bike racks and bollards need to fulfill a specific purpose while complementing their surroundings, whether located in a park or an urban setting.

Wishbone bike racks cleverly embrace an elegantly minimalist approach, allowing them to fit any application or space: simply install as many as required. Many of our models include a protective barrier to avoid damage to bikes or to themselves.

## Just Because

We love bringing great ideas to life. How to best engage people in public spaces and places is a multifaceted, ever-evolving conversation.

Many of the resultant ideas from these broad discussions provide kernels of inspiration for new product development. Exploring these concepts often requires significant investment in time and energy, and not all of them make it to production.

So why do we sometimes take on such risk? Just because!

# Memorials and Dedications

## Complete Service and Low Maintenance

Municipalities specify Wishbone benches for their dedication programs because we make it so simple for everyone. We offer a variety of bench styles suitable for a plaque. We also design and manufacture bronze plaques with our respected foundry partner and then securely flush-mount them on the selected furnishings for a clean, professional fit.

Donors can enjoy their beautiful Wishbone memorial benches for years, and municipalities can save time and money with the simplified maintenance requirements over the lifespan of the products.

# Technical Information

## Simplifying Project Design

We understand the importance of information, particularly when planning a project. To save time during design, all of our technical drawings are intentionally available for free in a variety of formats. They can be directly dropped into a project layout.

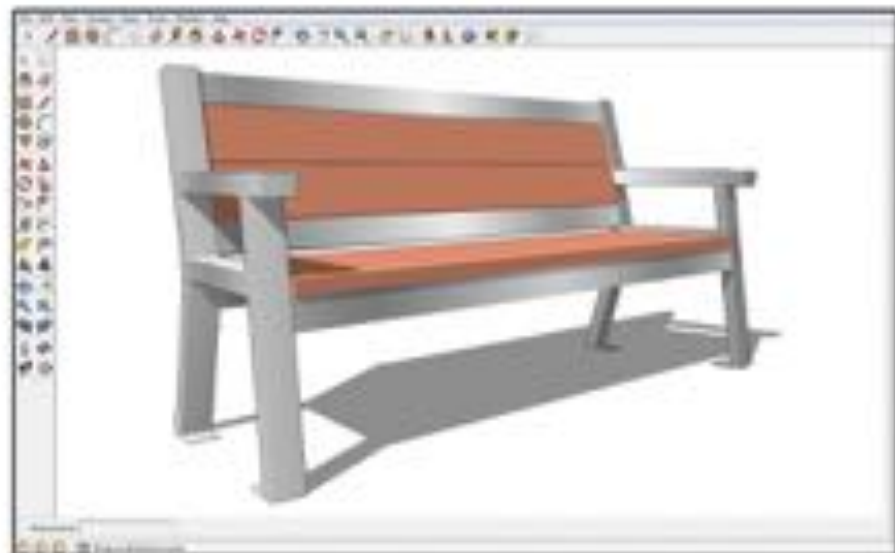

- SketchUp
- Revit
- Autodesk
- PDF
- DXF

## Simplifying Everything Else

Whether just considering options for site furnishings, or preparing to install them, Wishbone provides all necessary documents and makes them easily accessible through our website.

- Product Specification Sheets
- Product Brochures
- Product Installation Guides
- Technical Bulletins
- Warranty Information

Everything is available at [WishboneLtd.com/all-downloads](http://WishboneLtd.com/all-downloads).

# Warranty

10  
Years

Wishbone products are backed with one of the best warranties available

## 10 Years

Limited warranty on all recycled plastic against rotting, splitting, cracking, or splintering.

Limited warranty on all aluminum, cast aluminium and steel frames and supports against structural failure under standard maintenance and use.

## 5 Years

Limited warranty on all products for workmanship and/or manufacturing defects.
